Trusted by professionals for over 25 years, we use our industry leading expertise to provide simple and complete lighting solutions to reinvigorate any space. With well-designed, high-quality products that each go through a rigorous testing process, 4lite makes a difference to professional users by transforming and enhancing a wide range of applications.

Welcome to 4lite
Our experts are dedicated to innovation – investing in tools, research, and facilities around the world to deliver the latest in lighting design, technology, and performance. Our industry leading smart products offer customers the opportunity to have their lights to do everything they want and more.

Utilising smart Connected by WiZ technology, customers can enjoy full control of lights whether it is through Wi-Fi, mobile data networks, the Wi-Fi remote or existing switches.

4lite is part of Endo Lighting Corporation of Japan, a global business renowned for its expertise in LED lighting.

What we do, we do well. All our products go through a rigorous testing process, ensuring we can deliver quality products that make a real difference. We know how important product quality is to you and your customers, that’s why every product you buy from us is well-designed and thoroughly tested.

We’re delighted to have achieved an LIA certification for our UK testing facility, which is one of six of its kind in the UK. This means all our products are rigorously tested in-house with our state-of-the-art goniophotometer, allowing our experts to verify their quality and performance, and ensure they adhere to the highest industry standards.
You can trust our products are fully compliant; our fire rated downlights are tested to 30, 60 and 90 minutes. We pride ourselves on developing products to the highest standards.

That’s why all 4lite products come with a minimum 4-year warranty* to give our customers complete peace of mind. We also offer superior pre-sales and post-sales support. With a team of highly skilled lighting designers and technical engineers on hand to assist any queries. This is backed up by fantastic sales and marketing support.

*Minimum 4 year warranty requires a registration. Please register at 4liteuk.com/warranty.
(excluding the essentials range)
Product Delivery

Our warehouse staff have a wealth of experience in warehouse management, ensuring our products are despatched efficiently. From our 100,000 square ft warehouse and production facilities in Warrington we operate our multi-million-pound stockholding, allowing us to offer next day delivery to the UK and a same day collection service and a 2-3 day delivery within Mainland Europe.

4lite has a state of the art showroom in Cheshire, accessible to you if you would like to book an appointment please contact your local Sales Manager.
Gather information required for a lighting design to fill out the template, including drawings or dimensions, specifications and ceiling heights.

Submit these details to your local Sales Manager.

Once completed, your lighting design will be emailed out to you, including part codes and quantities, lighting calculations, and marked up drawings if available.

4lite offer free access to our Lighting Design Team, allowing you our valued customers support with your lighting design schemes for all your commercial projects. Our highly experienced team use the latest Relux and Dialux software and can deliver designs tailored to your specific needs, with fast turnaround times, all free of charge.
Welcome to the beautiful world of 4lite Connected by WiZ...

Get your lights to do everything you want and more. Using 4lite Connected by WiZ technology you can enjoy full control of your lights whether it’s through Wi-Fi, mobile data networks, the Wi-Fi remote or your existing switches. By giving you more ways to control, you’re spoiled for choice when it comes to how you’d like to interact with your light. Works with IFTTT and thanks to the cloud, 4lite Connected by WiZ lights integrate easily with most other connected systems so you can use triggers from your other favourite apps. Turn on the light when my security camera detects motion. Change the light to cool white when it gets hot. Change the light to bright red in case of a carbon monoxide emergency. With Hey Google, Apple Siri shortcuts on iOS 12, Samsung SmartThings and Amazon Alexa, you can even control your lights with your voice!

**Features**

- **Warranty (yrs)**: The product is backed up with a minimum XX year warranty.
- **Dimmable**: This product is dimmable.
- **USB**: This product utilises batteries and is charged using USB 2.0.
- **IK Rating**: This product has achieved an impact protection rating of IK XX.
- **AC LED no driver required**: This product utilises AC alternating current.
- **Solar powered**: This product utilises solar powered batteries.
- **CCT selectable**: The colour temperature on this product can be selected.
- **Fire Rated**: This product is fully fire rated.
- **Solar powered**: This product utilises solar powered batteries.
- **Bluetooth**: This device is Bluetooth enabled.
- **Solar powered**: This product utilises solar powered batteries.

**Compliance**

- **CE Mark**: Conformity with European health, safety, and environmental protection standards.
- **UKCA Mark**: Conformity with the applicable requirements for products sold within Great Britain.
- **Part C**: This product is fully tested to meet Part C of Building Regulations (resistance to contaminants and moisture).
- **Part E**: This product is fully tested to meet Part E of Building Regulations (resistance to sound).

**Specification**

- **Class 1**: This product has an earth connection.
- **Beam angle**: The beam angle achieved by the specified product.
- **Zone 2**: This product is compatible for use in bathroom Zone 2: BSEN7671:2008.
- **B22**: This product will use a B22 lamp.
- **RA Rating**: Ra value, provides information about the quality of the colour rendering of a light source.
- **Colour rendering index (CRI)**: measures the ability of a light source to accurately reproduce the colours of the object it illuminates.
- **Cut out dimensions**: Cut out size needed for installation.
A guide to 30, 60, 90 minute fire rated downlights

If you are installing or replacing recessed lighting in a domestic or commercial property, then it’s important to understand what you need to do to stay within the law. And how you can keep the building’s occupants safe.

Downlights are increasingly popular in homes and workplaces but only some of the options are classed as fire rated downlights. Understanding what that means, and the classification system, can ensure that you choose the correct rating for your next project.

What are fire rated downlights?
Fire rated downlights are a legal requirement for any lighting that is either recessed or semi-recessed into a ceiling. This is because creating a hole in the ceiling compromises its fire retardancy. Plaster board ceilings offer a degree of resistance to fire, but this is reduced by the fact that holes have been cut into its surface. Fitting the correct fire rated downlight “plugs” this gap and restores the fire-resistant surface. Therefore, if a fire did break out, its progress would be slowed. Also, many fire rated downlights incorporate an intumescent pad. If this is exposed to heat, it expands, further interrupting the spread of fire. Fire rated downlights can also be fitted with an additional safety feature—a fire hood. This serves to avoid accumulated dust and other debris interfering with the downlight’s effectiveness in a fire.

You should also make sure that the downlights you purchase are fitted with a moisture seal. This stops condensation from penetrating the ceiling hole.
How the ratings work
Clearly, fire rated downlights cannot dampen or extinguish flames. Their purpose is to slow a fire's progress across the ceiling. The effectiveness of these lighting components is measured in classifications of 30, 60 and 90 minutes. That indicates the timeframe you have before a fire would cause the ceiling to collapse. Each rating is designed to be used in different circumstances and locations.

When do you not need fire rated downlights?
There is no obligation to use fire rated downlights if you are fitting surface mounted ceiling lights.

Which rating do you need?
The fire rating of a downlight must match the fire rating of the ceiling, in order to maintain its minimum period of fire resistance. Generally, downlights with the lower ratings, and therefore a shorter timeframe for fire resistance, are used on lower floors, where occupants have less distance to travel. Downlights with higher ratings are used on higher floors, to give people a longer time to evacuate the building. Fortunately, the majority of downlights are tested for up to 90 minutes of fire resistance, which is suitable for most buildings.

Browse our full range of fire rated downlights on the 4lite site. If you have any questions, please don’t hesitate to contact us!

Festoon & Lanterns

83. LED Festoon Lights
84. LED Festoon Light Holders
86. LED Portable Lanterns
**LED Festoon Lights**

**Features**
- Heavy duty festoon lights.
- Outstanding durability.
- Weather-proof materials for all year-round use.
- Available in 11.5m and 20m length. 1m distance between lamps.
- Comes complete with E27 Warm White LED lamps (2700K).
- Flexible mounting options, mount on a flat surface or suspend from above (hardware not provided).
- 4L2/8000 - 11.5m kit with 10 lamps (plus 2 spare), linkable up to 20 sets.
- 4L2/8001 - 20M with 20 lamps (plus 2 spare), linkable up to 10 sets.
- LED Lifespan L70 20,000 hours.

**Compliance**
- 4 YEARS Warranty
- IP44

Festoon & Lanterns

**Festoon Light Holders**

### Features

- Heavy duty festoon lamp holders.
- Outstanding durability.
- Weather-proof materials for all year-round use.
- Available in 11.5m and 20m length. 1m distance between lamps.
- Compatible with E27 LED lamp (not included) only.
- Flexible mounting options, mount on a flat surface or suspend from above (hardware not provided).
- 4L2/8002 - 11.5m kit with 10 lamps (plus 2 spare), linkable up to 20 sets, suitable for LED lamps only.
- 4L2/8003 - 20M with 20 lamps (plus 2 spare), linkable up to 10 sets, suitable for LED lamps only.

### Compliance

- IP44
- E27
- UK
- CE

### Specification

- Suitable for use in:
  - Garden
  - Hospitality

### Features

- Modern die-cast aluminium LED lanterns suitable for domestic applications.
- Battery powered and charged using USB 2.0 meaning no installation is required, is maintenance free and is completely portable.
- Wireless integrated speaker allows audio playback using bluetooth connectivity between lantern and smart device (4L2/4101 only).
- Multi-level touch switch allows end user option of different light dimming options. (4L2/4100 only).
- L70 36,000 hours average lifetime.

### Compliance

- **IP54**: Suitable for use in: Garden

Solar Wall Lights, Solar Bollards & Bollards

89. LED Solar Bollard
90. LED Solar Wall Light
92. LED Rectangular Solar Bollard
93. LED Rectangular Wall Light
94. LED Circular Solar Bollard
95. LED Circular Solar Wall Light
96. LED Domestic Bollard
Modern die-cast solar powered aluminium LED bollard suitable for domestic applications.

Graphite textured powder coat paint finish provides enhanced durability.

Rotatable head design which can swing in ± 90° allowing for a varied range of installation options.

PIR motion sensor modes:

- Mode 1: 15% output after sunset, motion detected 100% output, no motion 15% output for 15 hours.
- Mode 2: Motion detected 100% light output, no motion off.
- LED lifespan L70 36,000 hours.

SKU Code | EAN        | Description    | Lumens | CCT    | Input | Hertz |
---------|------------|----------------|--------|--------|-------|-------|
4L2/6001 | 5056144219056 | LED Solar Bollard | 165    | 4000K  | 3.7V  | DC    |

Solar products will not work optimally straight out of the box without being charged by full sunlight. Once the fitting has been recharged, we recommend in Winter months the product is set to PIR motion sensor, as the sunlight is not sufficient to support continuous battery use through the night.

* Product is 4 year warranty. Battery is 2 year warranty. This is an extended warranty that requires registration.

### LED Floodlight PIR

#### Features
- Professional IP65 rated floodlight for external applications.
- PIR option available, perfect for security lighting
- Pre-wired with 1m cable.
- Full range of wattages to cover a number of applications (from low output for gardens and security, to high output for outside storage and car parks).
- Die-cast aluminium construction ensures durability and strength.
- LED lifetime L70 50,000 hours.

- Unique luminaire fixing clip design allows option of mounting onto BESA box.
- LED performance allows point-to-point replacement of existing fluorescent luminaires.
- Lockable heavy-duty stainless steel clips supplied as standard for added safety and security.
- Durable IP65 polycarbonate non-corrosive.
- Impressive performance, up to 7320 lumens.
- Operating Temperature -10° - 40°.
- LED lifespan L70 30,000 hrs.

Features: *IP65, IK08*

Suitable for use in: • Carparks
• Warehouse
• Stairwells
• Corridors

**Glossary**

**Beam angle** - Beam angle is a measurement of how the light is distributed. LED beam angles typically vary between 10° - 120°. The beam angle is the area where the light is at its most intense.

**Bathroom Zones** - Bathroom zones are areas where electrical equipment must offer a certain degree of protection against water. There are three classified zones and a further zone which is for installations classed as being 'outside of the other zones'.

**Colour temperature** - The Colour Temperature is a description of the warmth or coolness of a light source. It is a scale that measures how ‘warm’ (yellow) or ‘cool’ (blue) the light is. It is measured in degrees of the Kelvin scale (K). The lower the K the warmer the light.

**Colour rendering** - This is an assessment of how the light source shows object colours “naturally” when compared to a familiar basis of reference, either natural or artificial light source. Expressed as a rating from 0 to 100 on the Colour Rendering Index (CRI).

**IP protection** - All electrical devices are tested to determine a level of resistance against the intrusion of liquids. Once tested, the product is given an IP rating, which stands for Ingress Protection. The higher the IP rating the more watertight.

**IK Rating** - IK ratings are defined as IKXX, where "XX" is the number from 00 up to 10, indicating the degree level of protection provided by the fitting against external mechanical impacts.

**Lifespan** - The lifetime is the number of operating hours until the light intensity is reduced.

**Protection class** - Power supplies fall into one of three protection classes, based on the need (or not) for a protective earth connection Class 1, Class 2, or Class 3.

**Fire rating** - Fire Resistance is an important and detailed requirement for buildings where fire resistance is expressed as the number of minutes of time duration where the building material and/or its component has the ability to withstand and resist the effects caused and result from a fire.
